M166 SAFETY Mandoline

patented

The safety principle is very simple:

The consumer shall not be able to cut anything without placing the safety carriage on mandoline first. Blades will not enter the blade slot if the carriage is not placed on.

An additional safety feature is the new *safe hands*[™] silicone plunger. Your fingers can not reach the blade.

Special features include:

- ★ durable sleek design
- ★ Polycarbonate carriage and silicone plunger
- ★ infinitely adjustable feeder surface for indefinite slice thicknesses
- ★ including 5 different blades: slice, fine Julienne, coarse Julienne, coarse grate and waffle cut
- ★ including safe blade storage box. Simply snaps onto the mandoline
- ★ convenient non-skid rails under the mandolin, fits any bowl without slipping
- ★ convenient extractable metal stand
- ★ dishwasher safe
